3] return
4] goto (X)

* **Control Transfer statement. [CTS]**

→ we have 3-Types of CTS.

i) break

2) continue

3) return

---

1) break

→ It is used to transfer the control outside the block.

2) continue

— It is used to transfer the control back to the Condition.

3) return

→ It is used to transfer the control back to the Calling Method with Maximum of 1 data from Called Method.
